

1-Geographical Sales Analysis Dashboard:

This dashboard provides an interactive overview of sales performance across geographical regions, product categories, and customer segments. It includes sales by segment, category-wise sales, regional sales distribution, and geographical filters for exploring data by country, state, and city. These visualizations help users compare sales performance, identify geographical patterns, and understand customer segment contributions to support data-driven business decisions.

2. Relational Report:

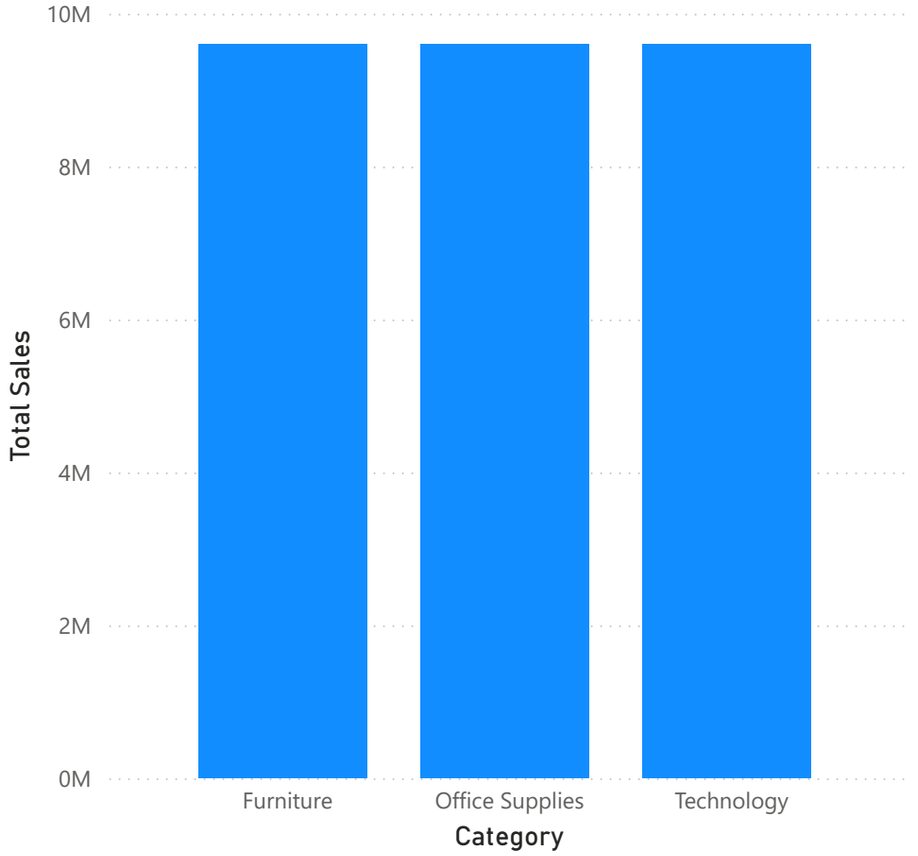

This report presents individual sales transactions, including Order ID, Customer Name, Product Name, Region, Sales, and Profit. Transactions are sorted by Sales in descending order and filtered to display only profitable records. It helps identify high-value transactions, examine customer purchases, and monitor profitability.

3. Matrix Report

This report summarizes Total Sales, Total Profit, and Quantity across Region, State, and City using the Geo_Hierarchy. Drill-down and drill-up operations allow users to explore geographical performance at different levels. It helps compare regions, identify high-performing cities, and support regional business planning.

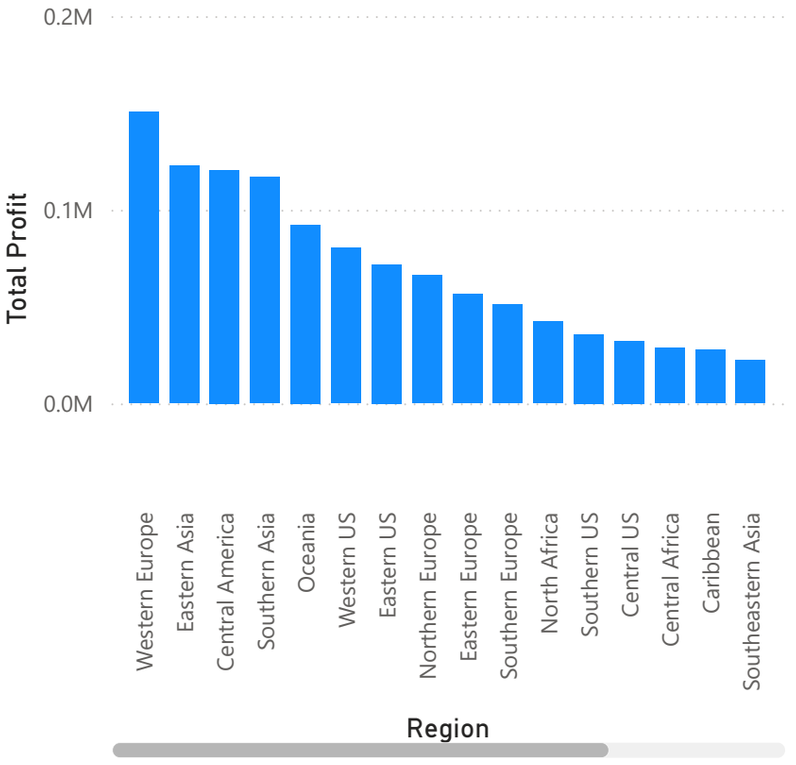

Sales by Category

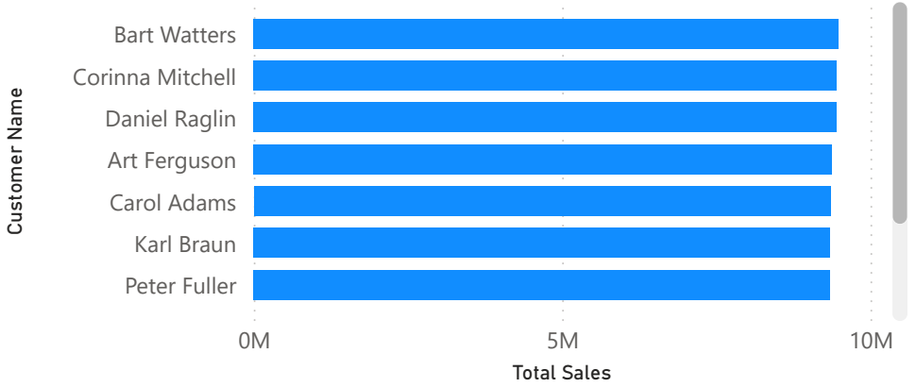

Sales Trend by Year

Profit by Region

Top 10 Customers by Sales

4. Comparative Analysis:

This report compares sales by product category, profit by region, the top ten customers by sales, and annual sales trends. The charts reveal differences in product performance, regional profitability, customer contributions, and sales growth over time. These insights support business strategy, customer prioritization, and performance evaluation.

Total Sales

6_Executive Dashboard :

The Executive Dashboard provides an overall view of business performance through key performance indicators (KPIs) and interactive visualizations. It displays Total Sales, Total Profit, Total Orders, and Profit Margin, along with sales by region, sales by category, monthly sales trends, top 10 customers by sales, and profit by segment. Interactive slicers allow users to explore business performance by region, category, and year, supporting effective monitoring and decision-making.

Sale	Profit	Order
9.60M Total Sales	1.10M Total Profit	26K Total Orders
3M Sales Target	300K Profit Target	5K Order Target
3.84 Sales Achievement %	3.67 Profit Achievement %	5.15 Order Achievement %
Achieved Sales Status	Achieved Profit Status	Achieved Order Status

7-Business Scorecard

The Business Scorecard evaluates business performance by comparing actual results with predefined targets for Sales, Profit, and Orders. It displays actual values, target values, achievement percentages, and performance status indicators. Conditional formatting highlights whether each target is Achieved, Partially Achieved, or Not Achieved, helping users identify performance gaps and monitor progress toward business objectives.
